Dear K-State faculty, students, alumni and friends,

Together, we have embarked on two bold missions. First, K-State is striving to be nationally recognized as a top 50 public research university by 2025. Second, we are raising $1 billion through the Innovation and Inspiration Campaign to move us closer to our 2025 goals. As of April 1, we have raised $845 million. This generous investment in K-State is already fueling positive results by supporting groundbreaking research, helping students explore new opportunities and creating state-of-the-art facilities where innovative work is inspired.

Many K-Staters have inspired this tremendous success, notably Kirk and Noel Schulz. In the last seven years, their leadership has helped elevate the university and...
Welcome to Good for K-State, a magazine devoted to the inspiration and impact of private philanthropy for Kansas State University. We invite your comments, questions and ideas. Just send an email to good@found.ksu.edu. We are eager to hear from you!

Good for K-State is published for the thousands of alumni and friends who advance K-State through philanthropy. Thank you for all you do to keep K-State strong!

Rand Berney
Co-chair, Innovation and Inspiration Campaign
Farewell, First Family
In the past seven years, Kansas State University has reached some impressive milestones, many of them thanks to the vision and leadership of outgoing president Kirk Schulz. Drs. Kirk and Noel Schulz will be leaving K-State in mid-May for Pullman, Washington, where Kirk will take over as president of Washington State University. Noel, who is the associate dean for research and graduate programs at K-State’s College of Engineering, will teach engineering in WSU’s Voiland College of Engineering and Architecture.

In 2009, Kirk was selected as the thirteenth president of Kansas State University. Soon after arriving, Kirk and campus leaders developed plans to move K-State toward being nationally recognized as a top 50 public research university. In the ensuing years, K-State alumni, faculty, staff, students and friends have supported this initiative with record fundraising success, which has fueled advancements universitywide. In 2015, Kirk and Noel, working with KSU Foundation staff, generous donors and volunteers, helped the university raise $141.5 million, the third-highest figure in K-State history. Overall, K-State has topped $100 million in funds raised in four consecutive fiscal years. The first family’s leadership and passion for K-State have been instrumental in K-State’s recent fundraising success.

“Kirk and Noel worked tirelessly and enthusiastically to connect with alumni and friends of K-State to encourage support for the university,” said Greg Willems, president and CEO of the KSU Foundation. “I enjoyed watching them connect with K-Staters on personal visits or at events. Their passion for the work being accomplished at K-State motivated so many to believe in the vision of enhancing K-State’s status and made them proud to be part of the K-State family. I will miss working with them, but am confident that we will continue to move K-State forward with the outstanding faculty, staff and students on campus and the philanthropic investment of K-State supporters.”

The Schulz era not only elevated K-State, but positively impacted the state and region as well.

“The Board of Regents is greatly appreciative of President Kirk Schulz and the time he spent at Kansas State University, where under his watch, K-State has achieved record levels in research expenditures, overall student enrollment and student body diversity,” said Shane Bangerter, chair of the Kansas Board of Regents. “K-State’s fundraising success over the past four years demonstrates an ongoing belief by countless individuals in the direction of this historic university. A true champion of strategic planning, President Schulz has done wonderful things for this university and the entire state of Kansas, setting the institution in the right direction to create the workforce tomorrow’s economy will need.”

The Schulzes have enjoyed their time at K-State and being part of the K-State family.

“The success that K-State has seen so far in reaching 2025 benchmarks is because of the wonderful faculty and staff who collaborated to create and implement the plan and generous supporters investing in the future,” Kirk said. “I am proud of all that we’ve accomplished so far and know that K-State will continue to succeed as it strives to be recognized as a top 50 public research university. The outstanding faculty, staff, students, alumni and friends of the university will see to that. We leave knowing that the university is in good hands.”

Greg Willems (left), KSU Foundation president and CEO, and Kirk Schulz.

PHOTO: DAVID MARX PHOTOGRAPHY COURTESY PHOTO
In 2011, K-State launched a visionary plan for the university’s future: K-State 2025. With the goal of becoming a top 50 public research university by the year 2025, the plan has elevated the university’s research, faculty and staff support, engagement and extension, the undergraduate experience, the graduate scholarly experience, athletics and facilities.

Now, five years into the strategic plan developed with Kirk Schulz’s leadership, gifts from alumni and friends have helped fuel tremendous progress. As we continue to build excitement for the university’s 2025 goals through the $1 billion Innovation and Inspiration Campaign, it is exciting to reflect upon how far we have come.
Record fundraising success
The surge of financial investment across the academy, athletics and the Alumni Association is a testament to the pride and commitment of the K-State family.

$168 million three-year fundraising average
$99.5 million raised in FY 2011, just before K-State 2025 launched

Endowment growth
With endowed funds, a portion of investment returns provides annual financial support for the purpose each donor designates. However, for investment purposes, endowed funds are pooled together into an investment fund known as K-State’s endowment pool. Endowment growth sustains K-State long term, increases national prominence and indicates how much K-Staters care about helping future generations.

$337.5 million endowment value in FY 2011, just before K-State 2025 launched

Increased student support
Private gifts to K-State strengthened the student experience by funding a record number of scholarships and student success programs. As college education costs skyrocket nationwide, K-State has managed to maintain competitive affordability and a quality educational experience with help from philanthropy.

$15.4 million in scholarships and other student awards raised in FY 2015

Endowed faculty support
An outright or deferred gift to create endowed faculty funds will reward faculty with prestigious professional recognition, while helping them expand research and educational and programmatic opportunities for students.

27 new endowed faculty funds committed since K-State 2025 launched

Improved facilities
Gifts from alumni and friends have proven critical to developing responsive, timely and strategic facilities to address K-State’s needs now and in the future.

5+ major construction projects funded by philanthropy in FY 2015
Why a glassblower gives research an edge at K-State

Combining his love of science and creativity, Jim Hodgson serves as K-State’s scientific glassblower, but his path to this career was not straightforward. Hodgson graduated from K-State in 1982 with a degree in geology. After working for 11 years in oil exploration, Hodgson went in search of a new career where he could combine his childhood desires to be an inventor and a mad scientist. That’s when he remembered a Collegian article he’d read as a student about K-State’s scientific glassblower, Mitsugi Ohno.

In 1961, K-State committed to having a scientific glassblower on campus and hired Mitsugi Ohno, who had been working at the University of Tokyo in Japan. While working at K-State, Ohno constructed the first true Klein bottle. The Klein bottle is a closed surface with only one side, formed by passing one end of a tube through the side of the tube and joining it to the other end.

“I remembered the article in the Collegian about Mr. Ohno’s Klein bottle,” Hodgson said. “It seemed to me that scientific glassblowing might fulfill my creative desires and still allow me to use my scientific background.”

While working toward his degree in scientific glass technology, Hodgson was able to work with Ohno during the summers. Hodgson eventually replaced Ohno, who retired in 1996. Having a scientific glassblower on campus is fairly unique and an attribute that attracts leading researchers to K-State.

“Jim is able to construct any piece of glassware needed for general lab use or for very specific experiments requiring hand-tailored glassware,” said Dr. Ryan Rafferty, assistant professor of chemistry. “With Jim making pieces for our department, I can give feedback during the fabrication process, resulting in better glassware that will allow me to perform experiments and analysis I would not have been able to do without Jim on our staff. One reason I accepted my position at K-State was that our department has a glassblower that allows me to take my research to the next level.”

While Hodgson’s designs elevate research at K-State, he also continues to learn and conduct research in his field by attending American Scientific Glassblowers Society conferences. His travel to these conferences is supported by philanthropic dollars. “Since a lot of the apparatus we glassblowers make is something that may never have been made before, there are always new techniques to learn,” Hodgson said. “The opportunity to meet with your colleagues, exchange ideas, solve problems and learn new techniques is invaluable. You never know what one new thing might make the difference in the success of a research project. I’m grateful to donors for their support.”

Grandmother inspires student researcher

For Muriel Eaton, researching neurological proteins at Kansas State University is more than her part-time job or a launch pad for her future career. It is a personal mission for the junior biochemistry major from Leawood, Kansas.

Though she was always interested in studying science, Eaton’s focus narrowed when doctors diagnosed her grandmother with Alzheimer’s disease. After witnessing the grueling mental, emotional and financial toll on Alzheimer’s patients and caregivers, Eaton wanted to make a difference.

“Alzheimer’s is so widespread and it affects everybody,” she said. “It’s really hard to watch people go through that.”

During a prospective tour of K-State, she met Dr. Jeroen Roelofs, assistant professor of biology, who researches proteasomes, which can be targeted for treatment of cancer and neurological diseases. Instantly interested in Roelofs’ research, Eaton began working as his laboratory assistant the summer before her freshman year at K-State.

With significant help from philanthropic gifts to the university, Roelofs often engages young people like Eaton in scientific research as early as possible.

“How you can help

To learn more about how you can use your estate plan to enhance the student experience at K-State, contact the Gift Planning Department at 785-532-7531 or giftoptions@found.ksu.edu.

When newlyweds Sarah and Casey Dwyer, of Indianapolis, Indiana, created their wedding registry, they went beyond the usual china, stemware and household goods. They asked their friends and family to make a gift to K-State Proud, stating, “It would mean the world to us and, more importantly, would mean the world to a hard-working student.”

K-State Proud is a nationally-recognized, student-led philanthropy at K-State that helps students who have exhausted all other forms of financial aid but still need assistance. K-State Proud raises money during its annual campaign to provide Student Opportunity Awards to students in need, often providing the funds necessary to help keep a student from having to drop out.

Both Sarah and Casey served on the K-State Proud campaign team and saw firsthand the impact their work was achieving. “One of the girls that had received an award was in several of my education classes,” Sarah said. “Knowing that K-State Proud helped her to continue pursuing a teaching degree helped me see the power of K-State Proud.”

K-State Proud began 10 years ago, and in that time, a culture of philanthropy has grown on campus. “Working on the K-State Proud campaign showed me that philanthropy is also about connecting to others,” Sarah said. “My experience helped me feel the impact of people coming together to help others in need. When you hear the roar of the crowd wearing K-State Proud shirts at a basketball game, when you walk on campus and see students walking to class in purple, when faculty and staff invest time in helping students outside of the classroom — that’s when you can feel philanthropy around you.”

K-State Proud has also demonstrated the power of small donations from many people. “K-State Proud shifted my perception of philanthropy in a big way,” Casey said. “Before my first year as a volunteer, I thought of philanthropists solely as wealthy, big-time donors. Proud really opened my eyes to the potential of large groups who believe in a common purpose. In this case, our large group was the K-State student body and our purpose was helping fellow students. Donations might have been smaller, but the number of donors — the number of K-Staters who believed in helping their peers — was extraordinary.”

Sarah and Casey look forward to continuing their legacy of giving and encourage others to join them in becoming young philanthropists. “When you see the direct impact of your time, energy and donations, it’s a no-brainer to continue donating as alumni,” Sarah said. “We have the power to teach others, who may not have experienced anything like Proud during their college career, about the importance of philanthropy. I would encourage other young alumni to donate so that the next generation of K-State graduates can have an opportunity to make their mark on the world, just like other donors did for us.”

How you can help
To learn how you can support K-State Proud, please contact Jenna Harmison at 785-532-7611 or jennah@found.ksu.edu.
“PROUD really opened my eyes to the potential of large groups who believe in a common purpose.”

— Casey Dwyer
Building INNOVATION & Inspiration

FOUR STORIES OF PHILANTHROPY, PASSION & PURPOSE
Every day on the K-State campus, stories of innovation and inspiration take place — students discovering their life’s passion, researchers finding solutions to global issues, students and faculty using their skills to help others, and alumni and friends of K-State investing in K-State, making dreams come true.

In the following pages, you’ll read four stories demonstrating how philanthropic investments build innovation and inspire students and faculty to make a difference in the world.

**Innovative research**
Dr. Annelise Nguyen’s research is finding ways to make cancer treatments more effective and less toxic for patients.

**Inspiring opportunities**
K-State alumnus supports multicultural graduate students, training a more diverse workforce to be involved in planning communities.

**Innovative outreach**
Dr. Ray Buyle takes his engineering students out in the field to provide hands-on help to communities in need.

**Inspiring education**
Paying for five children to attend college was a family affair for one K-State family. Those children, now grown, honor their parents by investing in the education of K-State students.
Finding ways to make cancer treatment less toxic and more effective

Dr. Annelise Nguyen is working to find improved ways of treating breast cancer. She and another K-State professor have patented a method that enhances cell communications, improving the passage of chemotherapy drugs from one cell to the next. This would decrease drug dosage levels and make cancer cells less resistant to drugs.

Gifts investing in cancer research at K-State are helping Nguyen, associate professor of diagnostic medicine and pathobiology in the College of Veterinary Medicine, and other researchers make these important advances. “Philanthropy supports students in my lab who help me answer these research questions and also buys lab technology,” Nguyen said. “Biomedical research is not cheap.”

The desire to find an alternative to costly animal-based research led to another patent at K-State. “The traditional approach of using hundreds of mice for testing drug effectiveness in biological systems can cost thousands of dollars, so it’s quite expensive to test compounds that could potentially be a cancer drug,” Nguyen said. “We tried to find a viable alternative to animal-based research by creating a micro-environment in a test tube that has the exact same environment as a living animal. In the process, we created PepGel, which provides a three-dimensional environment where we can more accurately test how a compound will respond in a clinical trial.”

Nguyen’s research is partially supported by a recent gift from the Flossie E. West Memorial Trust in Augusta, Kansas. “The directive of the trust is to fund cancer research,” said Dave Bisagno, one of three managing trustees of the trust and a K-State alumnus. “The founder of the trust set it up in honor of his wife, who had cancer. With my ties to K-State, I wanted to support the exciting research happening at K-State.”

That support is making a difference now and well into the future. The Johnson Cancer Research Center at K-State provides nearly $500,000 a year from privately donated funds to support about 100 K-State cancer research teams. This funding often provides the leverage needed to win large grants that will provide dividends over the years in K-State’s fight against cancer.

Nguyen uses donor funds to meet with other cancer researchers at conferences where they can share their findings with each other and advance cancer research overall. These funds also support the students in her lab who are doing important research alongside Nguyen and other K-State cancer researchers. “I train more than 40 undergraduate and graduate students,” Nguyen said. “They are the future of cancer research.”

INSPIRING OPPORTUNITIES

Scholarship empowers student to give community a fresh look
A three-phase beautification project could be on the horizon for Riley Avenue. The main thoroughfare for Ogden, Kansas, which serves as an access point for Fort Riley military base, is a focus of K-State student Alicia Hunter’s studies and professional internship.

As an intern with the Flint Hills Metropolitan Planning Organization, Hunter has played a key role in redevelopment of the avenue. She enlisted fellow K-State regional and community planning students as collaborators on initial designs and will pursue construction of the designs through her internship.

“There’s something about actually knowing what it’s like on day-to-day tasks,” Hunter said. “The community gets to work with passionate, skilled volunteers, and I appreciate an opportunity to help others get experience on a project they might not get elsewhere.”

Opportunity is a theme throughout Hunter’s academic career. She recently added a second internship with the Flint Hills Regional Council and plans to pick up a third this fall with the City of Manhattan, Kansas. When she decided to study community planning, her journey to Kansas State University was aided by opportunities like the Ray Willis Regional and Community Planning Scholarship.

“I do depend on scholarships to be able to afford school,” Hunter said, adding that she is grateful for the investment in her future career.

Ray Willis, a 1971 graduate of K-State’s regional and community planning program, created the scholarship to help diversify the program’s student body by encouraging underrepresented populations. Now working in Chicago as director of community planning and development for the U.S. Department of Housing and Urban Development, Willis wanted to give back to his alma mater and make a difference for others.

“Mr. Willis’ endowed scholarship fund is a catalyst for the college to reach minority graduate students,” said Stephanie Rolley, department head and professor in the Department of Landscape Architecture and Regional & Community Planning. “Issues facing our communities must be addressed with inclusiveness and that begins with a more diverse student population.”

Bradley Halpleib and Rachel Jackson work on a construction site in Alabama in January 2015.

Innovative outreach
From Seneca, Kansas, to New Orleans, Louisiana, to Mobile, Alabama, Kansas State University engineering students have worked to restore homes and historic landmarks. Through it all, philanthropic gifts from alumni and friends helped make it possible.

Students have the option to spend spring or winter breaks participating in service-oriented trips led by Ray Buyle, associate professor of architectural engineering and construction science. Buyle helps support these endeavors with annual funds from his Tointon Construction Management Chair, created through an endowed gift from K-State alumni Bob and Betty Tointon.

With Buyle’s guidance, students have developed cost estimates and a list of priorities for a historic museum restoration. They’ve built homes in communities devastated by Hurricane Katrina and remodeled adobe homes in New Mexico. By supporting activities like these, the faculty chair empowers Buyle to expand the learning experience beyond classroom and campus borders.

“Having funds to do these types of activities broadens our horizons, gives students the opportunity to see things they may not have seen before and helps them see how their major applies in the real world,” Buyle said, adding his appreciation for the Tointons’ generous investment. “I think it motivates other students, too, as they learn that these out-of-classroom experiences are available through our department.”

Bill and Bernie Hintz worked hard to put their five children through college, but also worked hard to teach their children how to support themselves.

For 13 years, the Hintz kids shared a newspaper route in Salina, Kansas, delivering up to 100 newspapers every day after school and early Sunday mornings, with help from their dad. Those earnings helped pay their way through Kansas State University, along with scholarships they pursued with help from their mom.

When Bernie Hintz turned 95 last November, her children decided to thank and honor her by creating the Hintz Family Scholarship for finance and accounting students in the College of Business Administration at Kansas State University.

“We wanted her to know how much we appreciated her efforts to get all five of us through K-State as a way to have a good life and be able to help support our families,” said Maureen Burson ’75, the second oldest.

“We were blessed to have parents with strong values. It was very important for us that she knew how much we appreciated the sacrifices she and Dad made,” said Jean Artz ’83, the youngest sibling.

Bill and Bernie Hintz had children at K-State from 1969 through 1983. Purple pride runs strong in the family, and the siblings gather annually for football tailgating. At their most recent tailgating event, they welcomed the first two recipients of the Hintz Family Scholarship, Alec Main and Timothy Stricker.

“It was so exciting to meet them and hear where they want to go in their careers,” Jim Hintz ’77 said. “That brought it back to reality, to meet these guys who are going to be successful in life.”

Through their scholarship gift to K-State, Maureen, Jean, Jim and brothers Greg ’72 and Al ’80 are continuing their parents’ legacy by inspiring future generations to work hard and succeed.

“It was great being able to meet the family that gave me the scholarship,” said Stricker, a sergeant in the Army Reserve who will finish his accounting degree this spring. “Their scholarship investment has given me motivation to get through college and earn a job that will allow me to one day return the favor to future college students.”

How you can help

"We wanted her to know how much we appreciated her efforts to get all five of us through K-State..."

— Maureen Burson
K-State Proud total surpasses $1 million

K-State Proud, a student-led philanthropic campaign at Kansas State University, has raised $1,030,000 and helped more than 520 students in the past 10 years. K-State Proud is a nationally recognized fundraising campaign for K-State. Guided by the leadership of the K-State Student Foundation, the campaign encourages students to show their K-State pride through philanthropy. All campaign donations support Student Opportunity Awards for K-State students who have exhausted all other forms of financial aid.

“The KSU Student Foundation and their K-State Proud campaign has created a level of engagement for student philanthropy that is second to none nationally,” said Greg Willems, president and CEO of the KSU Foundation. “Surpassing their million-dollar goal validates the vision and hard work of this outstanding organization and the students who have offered their service. We’re proud to be working with them to build a culture of philanthropy that begins while they are students and will continue for a lifetime of supporting K-State.”

Alumni Association celebrates 10th annual Wabash CannonBall

Wabash CannonBall Kansas City celebrated 10 years in style, drawing a crowd of nearly 800 K-Staters who raised about $275,000 for student scholarships. In the first nine years, the event built an endowment of more than $1.8 million and funded more than 300 scholarships for Kansas City-area high school students to attend K-State.

The popular K-State Alumni Association event was also held in Houston, raising $46,000 for scholarships, and Wabash CannonBall Colorado is planned for August 12 at the Pinnacle Club in the Grand Hyatt Denver. For more information, call 800-600-ALUM (2586) or visit www.k-state.com/WabashCannonBallColorado.
The KSU Foundation is fortunate to have a large body of trustees and directors who support the university generously and serve as ambassadors in their communities. Trustees elect members of the Board of Directors, who serve as the foundation’s governing body. Directors meet quarterly to consider strategic and policy issues and also serve on standing committees to provide guidance and oversight to foundation staff.

Phase 3B of Bill Snyder Family Stadium will debut this fall

The latest phase of the Bill Snyder Family Stadium master plan will be completed by the home football opener this season on September 17, completing $180 million in total improvements to the stadium. All funds were privately raised with zero state tax, tuition or student dollars used.

Phase 3B will complete the northeast corner of the stadium and provide fans with a fully enclosed stadium bowl and a 360-degree concourse. A new videoboard on the northeast corner will mirror the new system recently erected on the northwest corner of the stadium. There will also be a permanent showcase stage for the Pride of Wildcat Land Marching Band and new visiting team locker, training and officials areas.

Green Bay Packers All-Pro wide receiver Jordy Nelson ’07 and his wife, Emily, have pledged a gift to K-State Athletics to help complete Phase 3B. The football team’s locker room in the Vanier Family Football Complex will be named the Nelson Family Locker Room in recognition of the couple’s contribution. K-State Athletics also named the West Stadium Club Level the Steve and Kay Theede Club in recognition of Steve and Kay Theede’s recent seven-figure donation to the project.
Serving those who served

Kansas State University’s close proximity to Fort Riley means K-Staters are neighbors, coworkers and friends with military families, witnessing their many sacrifices daily. That proximity also helps K-State form strategic partnerships with Fort Riley to serve this unique sector of society.

Office of Military and Veterans Affairs

Led by Lt. Col. (Ret.) Art DeGroat, this office supports military-relevant programs, scholarship, research, outreach and curriculum across all K-State campuses. Visit k-state.edu/militaryaffairs to learn more.

Institute for the Health and Security of Military Families

Led by professor Briana Nelson Goff, Ph.D., a licensed clinical marriage and family therapist in the College of Human Ecology, this institute serves the research, academic, outreach and clinical service needs of today’s military family. Visit militaryfamilies.k-state.edu to learn more.

Non-Traditional and Veteran Student Services

This office is a centralized resource for student veteran needs and also oversees the Veterans Center, a space for relaxing, collaborating and studying in the K-State Student Union.

Inspired by sacrifice

New scholarship honors wounded warriors at K-State
It’s often a point of pride when families can trace their lineage to military veterans.

For Corey Van Otegham, an Iowa native completing a master’s of agribusiness at a distance through K-State Global Campus, that family history inspired him to join the Iowa Army National Guard.

More than 1,000 miles away, Houston residents Sam and Janet Peppiatt were inspired by their own family history to create a scholarship supporting wounded military veterans studying at K-State.

“I remember the sacrifices made by numerous uncles and cousins of mine during World War II and the Korean War, who lacked the means and support to improve their livelihood upon returning home to civilian life,” Sam Peppiatt said. “The obvious need to support some of our returning veterans and families is here again, as it was back then.”

Van Otegham, the first recipient of the Peppiatts’ Wounded Warrior Scholarship, couldn’t agree more.

“Many veterans who have served in combat zones have to carry the physical and mental burdens of war for many years,” said Van Otegham, who was injured during a tour of duty in Afghanistan. “It’s important to give veterans opportunities early following their service, so they have the skill set and tools necessary to continue their success, but now as civilians.”
